Two Product Style Changes

1) Imperial has improved the performance of the Reversible Wire Twisters with a design change to the cushioned throat area of the tool that holds the clipped wire. Instead of the three stripes, the shape will change to an oval. The TIGER WAVE name will no longer be used.

REVERSIBLE WIRE TWISTERS

Part numbers

25W – 6"

26W – 9"

2) For improved rust prevention, the pivot and jaws for ALL wire twisters will change from the historical buffed metal look, to a black oxide finish.

Look for these changes on shipments in late spring 2007. If you have any questions, please contact your local Imperial Tool representative, or call Stride customer service at 1-888-467-8665.
